

## WinEncrypt CryptArchiver

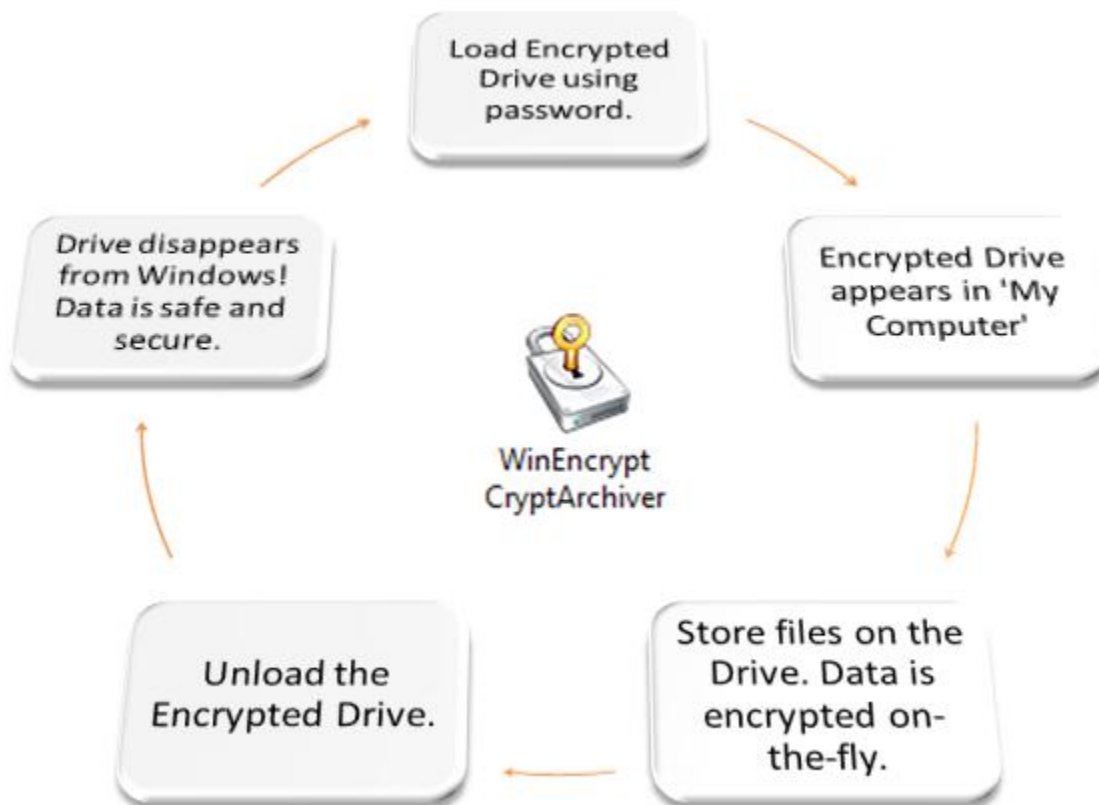

### Keep your important documents safe.

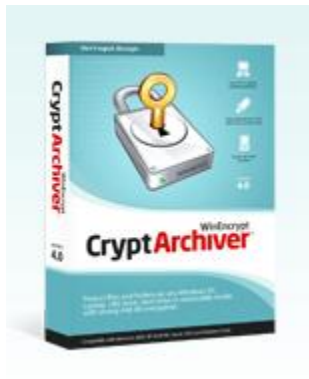

It's really simple to hide, encrypt and password protect your data with CryptArchiver. All you do is drag-and-drop your important files and folders into an encrypted drive - just like an ordinary drive!

Networks can be hacked, computers can be stolen. But encryption makes your data useless to anyone without the right password. Even if someone gets your encrypted files, they can't use them - that's the magic of cryptography.

### Don't Regret. Encrypt.

CryptArchiver uses very strong cryptography - the registered editions use up to 256 bit Blowfish and 256 bit AES algorithms. Compared to this, most on-line banking websites use only 128 bit cryptography! With CryptArchiver's strong security, you can rest assured that your files are accessible only to you. You are not limited to encrypting files and folders on your hard drive; CryptArchiver can also secure removable media like Zip, CD, DVD and USB drives.

- ▶ Keep your important files away from prying eyes.
- ▶ Create virtual "Encrypted Drives" upto 20 GB in size.
- ▶ Uses strong 448-bit Blowfish and 256-bit AES encryption.
- ▶ Easy to use, just drag-and-drop!
- ▶ Password-protects all types of files and folders.

## Technical Details

### Operating Systems

- Windows 2000 (Professional/Server) / 2003 Server Family
- Windows XP (Home/Professional) x86, x64 (32 & 64-bit)
- Windows Vista x86, x64 (32 & 64-bit)
- Windows Mobile Devices (Coming Soon!)
- Apple Mac OSX (Coming Soon!)

### Ciphers

- Blowfish
  - 256 Bit Implementation, CryptArchiver Lite Edition (trial edition).
  - 448 Bit Implementation, CryptArchiver.
- AES
  - 256 Bit Implementation, CryptArchiver.

### Disk space required

- 3.5 MB for installation.
- Size of encrypted files on disk can vary with requirement.

### Technical Standards

- SHA NIST FIPS
- Key Setting Pkcs5v2
- HMAC RFC2104
- HMAC test Vectors RFC2202
- IBS - ICS 35.080

### Over one million downloads till date

- Used by large multinationals as well as individual users the world over.

**An illustrative list of where CryptArchiver is used:**

## Fortune 500

IBM  
 HP  
 Siemens Power Generation  
 DuPont USA

## Consulting

Deloitte  
 Capgemini  
 Fletcher/CSI

## Research

NASA  
 Sandia National Laboratories

The Urban Institute
